

NHRA Strategic Policy Brief: Optimized Agreement

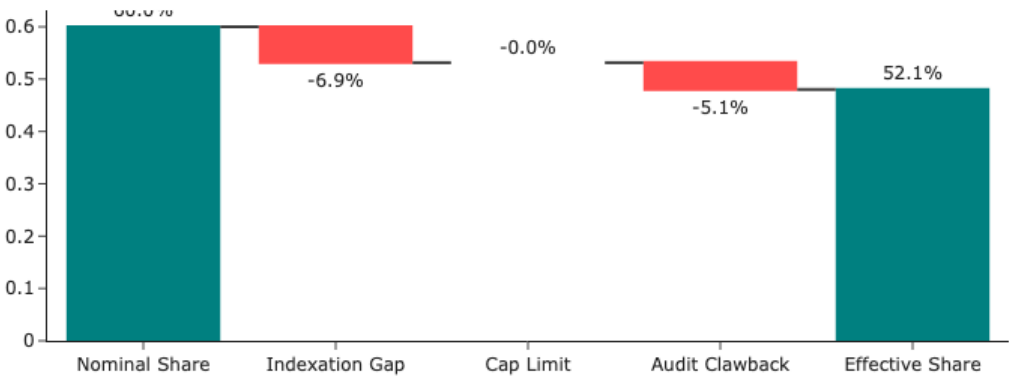

Date: 2025-12-28

Executive Summary

This simulation forecasts hospital system performance and funding dynamics for the 2025-2030 period. By 2030, the effective Commonwealth funding share is projected to reach **52.1%**, representing a significant departure from the nominal target of **60.0%** due to indexation and cap leakage.

1. Funding Leakage Analysis (VFI)

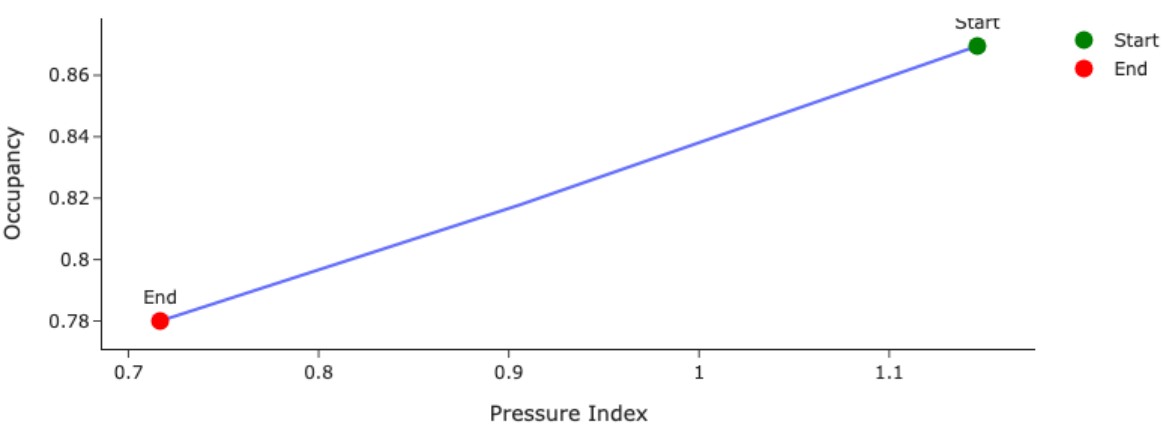

VFI Funding Leakage (Waterfall)

The waterfall above decomposes the 'leakage' between policy commitment and operational reality.

2. System Stability & Hysteresis

System Phase-Space (Hysteresis Loop)

The phase-space trajectory highlights the relationship between pressure and occupancy, indicating potential recovery paths from crisis modes.

3. Summary Metrics (2030 Forecast)

Metric	Value
Effective Share (%)	52.1%
Relative Risk Proxy	1.00
Within 4 Hours (%)	71.2%
Cumulative Pressure	4.59
